PROFILE

Recording location sound since 1993 — from covering South Africa’s post-apartheid elections for Sky News to three decades of documentary, wildlife and factual work in more than 30 countries. Calm under pressure, endlessly adaptable, and trusted by the world’s major broadcasters.

My current focus is wildlife and natural-history sound — capturing immersive and ambisonic recordings with state-of-the-art microphones and recorders, from the footsteps of ants on sand to the surround-sound of open savannah. I travel light with an up-to-date quiver of pro kit and deliver the best sound a shoot can yield.
